

Tushant Rajpal

Senior Software Engineer

Date Of Birth: 17th December, 1990
Contact: +91 9300970074
Email: tushant.raipal23@gmail.com
LinkedIn: <https://www.linkedin.com/in/trajpal>

Education

Qualification	College/University	Year	Percentage
B.E. (Electrical & Electronics)	Patel Institute of Technology (RGPV)	2012	76.47
XII	D.P. Sanskar Public School, MP Board	2008	70.44
X	Mithi Govindram Public School, CBSE	2006	45.00

Achievements & Awards

- Developed a CRM solution and successfully integrated it into a website within one month, ensuring seamless functionality and enhanced customer engagement.
- Managed multiple high-impact projects simultaneously, ensuring timely delivery, optimal resource utilization, and alignment with client objectives.
- Earned a Generative AI Certification from upGrad.
- Developed and implemented customized digital systems tailored to organizational requirements, improving operational efficiency and scalability.
- Integrated AI-powered capabilities into the CRM, including intelligent email generation, automated text/content creation, AI-driven chat responses, and smart workflow assistance.
- Leveraged AI-assisted development tools and automation techniques to accelerate coding, testing, and deployment processes, significantly improving development efficiency.
- Increased overall productivity by 60% through AI adoption, automation, and optimized workflows.
- Reduced manual workload by 70% through process automation and intelligent system integration.
- Achieved a 40% reduction in operational costs by streamlining processes and improving system efficiency.
- Significantly enhanced employee productivity, response times, and processing speed through digital transformation initiatives.
- Recognized for driving innovation, digital transformation, AI adoption, and operational excellence across projects and business functions.

Key Skills

Frontend Development	Backend Development	Database	Cloud Computing
- HTML5 - CSS3 - JavaScript - TypeScript - ReactJS - AngularJS - SCSS - NextJS	.NET .NET C# Core .NET Core - NodeJS - Python	- SQL Server - My SQL - PostgreSQL - MongoDB - DynamoDB - CosmoDB	- AWS - Azure
			Security
			- Authentication - Authorization - Oauth2
			Version Control
			- GitHub - GitLab - Bitbucket

Work Experience

Senior Software Engineer Primus Global, Bangalore

12/2025 - 02/2026

- Designed and built scalable APIs using .NET, Node.js, PostgreSQL, and AWS, handling 50K+ daily requests with 40% improved response time.
- Mentored 4+ junior developers, reducing production defects by 35% through structured code reviews and best practices.
- Led code reviews across 3+ projects, decreasing post-release bugs by 30% and improving maintainability.
- Implemented Agile workflows, increasing delivery velocity by 25% and cutting release cycles from 4 weeks to 2 weeks.
- Managed 3–5 parallel features under tight deadlines, maintaining 95% on-time delivery with zero critical escalations.
- Authored technical documentation across multi-stack systems, reducing new developer onboarding time by 40%.
- Optimized system performance, improving API throughput by 30% and reducing infrastructure load by 25%.
- Contributed to scalable and secure architecture designs, enabling 3x user growth without system redesign.
- Architected cloud-native applications with 99.9% uptime, supporting 10K+ active users.
- Integrated 5+ third-party APIs, accelerating feature rollout by 20% without increasing infrastructure costs.

Technical Lead Photon Interactive Pvt Ltd, Bangalore

02/2025 - 10/2025

- Architected and delivered scalable backend APIs supporting 40K+ daily transactions, improving system reliability by 35%.
- Directed development of high-performance front-end applications, increasing user engagement by 30% and reducing page load time by 40%.
- Managed 3+ concurrent projects including API and CRM implementations, achieving 95% on-time delivery under tight deadlines.
- Led cross-functional teams in system integrations and platform enhancements, improving interoperability by 45%.
- Standardized documentation practices, reducing maintenance effort by 30% and accelerating issue resolution by 25%.
- Leveraged AI-driven development tools to accelerate delivery cycles by 40% and improve overall code efficiency by 20%.
- Designed RESTful services for AI-enabled systems, enabling seamless communication and supporting 2x scalability.

Project Manager & Senior Software Engineer Search Education, Delhi

02/2020 - 01/2025

- Designed and delivered a user-centric client portal, streamlining operations and improving process efficiency by 35%.
- Collaborated with cross-functional stakeholders to translate requirements into technical solutions, reducing rework by 25%.
- Led comprehensive testing and debugging efforts, reducing production defects by 40% and improving application stability.
- Provided post-deployment support, resolving 95% of client issues within SLA timelines and improving customer satisfaction.
- Continuously adopted emerging technologies, accelerating feature delivery by 20% and enhancing system capabilities.
- Authored technical documentation and user guides, reducing support queries by 30%.
- Drove alignment through structured project discussions, ensuring 100% milestone visibility and minimizing delivery risks.
- Developed end-user training materials, increasing application adoption rate by 30%.

Analyst (Full Stack Developer) Ernst & Young, Gurugram

09/2019 - 01/2020

- Delivered high-performance web applications, improving system efficiency by 30% and ensuring

99% application stability.

- Partnered with design and frontend teams to enhance user experience, increasing user engagement by 25%.
- Led code reviews and quality assurance efforts, reducing post-release defects by 35%.
- Migrated legacy systems to modern architectures, improving performance by 40% and reducing maintenance overhead by 30%.
- Resolved client-reported issues within SLA timelines, achieving 95% first-response resolution rate.
- Authored development documentation and user manuals, reducing support dependency by 30%.
- Continuously upgraded technical expertise, enabling adoption of modern practices that accelerated delivery by 20%.

Full Stack Developer
Bit-7 Informatics, Bhopal

12/2018 - 07/2019

- Developed internal business applications, improving operational efficiency by 30% and reducing manual processing time by 40%.
- Enhanced legacy system functionalities, increasing workflow accuracy by 25% and minimizing recurring issues.
- Coordinated daily operational processes, improving inventory accuracy by 20% and reducing stock discrepancies.
- Designed and delivered onboarding programs for new staff, reducing ramp-up time by 35%.
- Analyzed sales performance reports to identify trends, contributing to 15% improvement in revenue planning accuracy.
- Mentored junior team members, improving task completion efficiency by 30% and strengthening team productivity.

Assistant Manager & Software Engineer
Krish Imports, Guayaquil Ecuador

02/2018 - 12/2018

Customer Care Representative
Motif India Infotech, Ahmedabad India

03/2017 - 12/2017

Assistant Manager
Krish Imports, Guayaquil Ecuador

05/2013 - 09/2016

Project Undertaken

- Educational CRMs
- Enterprise Applications
- Travel Applications
- Payment Gateway
- Property Applications
- E-commerce Applications
- EdTech Applications
