

Tushant Rajpal

Senior Full Stack Engineer |
AI-Driven Software Engineer |
Node.js & Cloud Specialist

Date Of Birth: 17th December, 1990
Contact: +91 9300970074
Email: tushant.rajpai23@gmail.com
LinkedIn: <https://www.linkedin.com/in/trajpal>

Professional Summary

Senior Full Stack Engineer with 12+ years of experience designing and delivering enterprise applications, modern backend systems, and cloud-based platforms using Node.js, ReactJS, .NET Core, Python, AWS, and PostgreSQL.

Experienced in API architecture, distributed systems, frontend engineering, cloud deployments, and workflow automation across EdTech, enterprise, CRM, and business applications.

Strong background in leading cross-functional teams, improving engineering processes, modernizing legacy systems, and delivering high-impact technical solutions in Agile environments.

Focused on building reliable, maintainable, and performance-driven applications while aligning technology decisions with business outcomes.

Achievements & Awards

- Successfully delivered enterprise applications and CRM platforms across multiple business domains including EdTech, enterprise systems, and automation solutions.
- Integrated intelligent automation capabilities including AI-assisted communication systems, workflow automation, and smart content generation.
- Led multiple concurrent engineering initiatives while maintaining delivery quality and operational stability.
- Improved engineering workflows through Agile practices, structured code reviews, and collaborative development standards.
- Contributed to backend modernization, frontend optimization, and platform reliability improvements across multiple projects.
- Recognized for driving technical innovation, process optimization, and digital transformation initiatives.

Key Skills

Frontend Development

- ReactJS
- AngularJS
- NextJS
- JavaScript
- TypeScript
- Redux
- HTML5
- CSS3
- SCSS

Architecture & Engineering

- Scalable Architecture
- Distributed Systems
- System Design
- API Integration
- Technical Documentation
- Performance Optimization
- Code Review
- Agile/Scrum

Backend Development

- NodeJS
- NestJS
- Python
- .NET Core
- ASP.NET Core
- REST APIs
- Microservices
- Event-Driven Architecture
- Serverless Architecture

AI & Automation

- AI-Assisted Development
- Generative AI
- Workflow Automation
- AI Integrations
- Prompt Engineering

Database

- SQL Server
- My SQL
- PostgreSQL
- MongoDB
- DynamoDB
- CosmoDB

Cloud**Computing**

- AWS
- Azure
- Docker
- Kubernetes
- AWS Lambda
- ECS
- CI/CD
- GitHub Actions

Security

- OAuth2
- JWT
- Authentication
- Authorization
- Secure API Design

Version Control

- GitHub
- GitLab
- Bitbucket

Work Experience

Senior Software Engineer**Primus Global, Bangalore****12/2025 - 02/2026**

- Developed backend services using Node.js, .NET Core, PostgreSQL, and AWS for enterprise-scale applications.
- Collaborated with cross-functional engineering teams to deliver reliable APIs and modern backend solutions.
- Improved application performance, monitoring, and production reliability through backend optimization initiatives.
- Contributed to architecture discussions, technical troubleshooting, and production support activities.

Technical Lead**Photon Interactive Pvt Ltd, Bangalore****02/2025 - 10/2025**

- Led full-stack engineering initiatives across ReactJS, Node.js, and AWS-based applications.
- Designed and maintained enterprise backend APIs and frontend systems for high-traffic business applications.
- Guided engineering best practices including code reviews, technical mentoring, and Agile delivery processes.
- Collaborated with product teams and stakeholders to translate business requirements into technical solutions.
- Introduced AI-assisted development workflows and automation practices to improve engineering efficiency.
- Supported frontend modernization initiatives improving usability, maintainability, and application performance.

Project Manager & Senior Software Engineer**Search Education, Delhi****02/2020 - 01/2025**

- Developed intelligent CRM and educational platforms using Node.js, ReactJS, Python, .NET Core, PostgreSQL, and AWS.
- Built automation-driven workflows including smart communication systems, chatbot integrations, and digital process automation.

- Led multiple projects through complete software development lifecycles from requirement gathering to production deployment.
- Collaborated closely with business stakeholders, designers, and engineering teams to deliver user-focused technical solutions.
- Improved engineering workflows through Agile methodologies, structured documentation, and release planning practices.
- Modernized backend systems and deployment processes to improve maintainability and long-term platform reliability.
- Mentored junior developers and supported architecture planning, technical discussions, and project delivery coordination.

Analyst (Full Stack Developer)

Ernst & Young, Gurugram

09/2019 - 01/2020

- Developed enterprise applications and backend APIs using .NET and Angular technologies.
- Participated in debugging, testing, and production support activities for enterprise systems.
- Contributed to application modernization and frontend enhancement initiatives.

Full Stack Developer

Bit-7 Informatics, Bhopal

12/2018 - 07/2019

Assistant Manager & Software Engineer

Krish Imports, Guayaquil Ecuador

02/2018 - 12/2018

Customer Care Representative

Motif India Infotech, Ahmedabad India

03/2017 - 12/2017

Assistant Manager

Krish Imports, Guayaquil Ecuador

05/2013 - 09/2016

Project Undertaken

- AI-Powered CRM Platform
- Enterprise Applications
- Cloud-Native Educational Platforms
- Payment Gateway Integrations
- Property Management Systems
- E-commerce Applications
- EdTech Platforms
- AI Automation Workflows
- Restful API Platforms
- Scalable Full Stack Applications
